

MolProbity Ramachandran analysis

5nfy.H.pdb, model 1

5nfy.H.pdb, model 1
 100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.

100% (100/100) of all residues were in favored (blue) regions.
 0% (0/100) of all residues were in allowed (pink) regions.
 None were in outlier (red) regions.
