

# MolProbity Ramachandran analysis

1wnc.H.pdb, model 1

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.

all angles (degrees) are within 180 degrees of the expected values.
